

HOW TO BEE A SUCCESSFUL STUDENT

FOUR tips for you to become a BETTER student!

Why should I be a successful student?

Bee-ing a successful student can unlock many keys into YOUR future, whether it is a new internship, job, or school. Although there are some people that breeze through school like it is nothing, most of us are not like them. Here are some tips on how you can bee a successful student!

01 MAKE INCREMENTAL PROGRESS

Focus on the process and the details along the way, not the end product. Although it is possible to go from a "C" to an "A", chances are, you might be disappointed if you fail to reach your target. Working in small increments is a practical approach to reaching your goals and you won't be as disappointed if you fail to reach them.

02 ORGANIZE AND PLAN

Organizing your work space and planning your study time(s) is one of the keys to becoming a successful student. Organizing allows you to perform your tasks more efficiently while planning your study time(s) allows you to perform better on exams and tests (than those who study sporadically).

Utilize materials such as planners (they help we promise) to help organize your tasks and events/study times more efficiently!

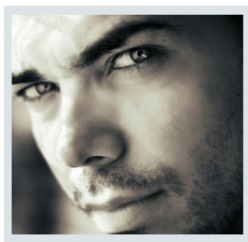

03 DO NOT PROCRASTINATE/CRAM

Admit it. We all do this to some extent. Although it happens from time to time, when it occurs on a regular basis, it is not good since students perform better when they do tasks over a period of time. In addition, students that study over a period of time tend to do better than those that cram the night before.

A tip to overcome this? Manage your time well, regardless of whether it is writing the tasks on a planner or creating a to-do list. It helps!

04 PAY ATTENTION

Although this is a no-brainer, paying attention in class allows you to become a SMARTER and a more successful student. Not only does it help students learn and process the information, it allows them to ask questions/clarifications when needed. Also, paying attention in class can allow you think critically to further your knowledge on the information!
